COMPONENT REPORT

well aligned with the supplied brief for contemporary musical theatre; the vocal control and naturalistic acting make this a very a strong tape for the stated task for a workshop environment.

Verdict: Strong for this levelReliability: high (ok)

Prioritised fixes

Sharpen the wit in the dialogue

The brief mentions 'wit'; adding a bit more 'snap' to the responses in the scene will better align with the character description.

Clarify final consonants in legit sections

In the softer passages of the song, some word endings are slightly lost; sharpening these will improve lyric delivery.

Why this score

What works, why it isn't 100, and what would close the gap.

ACTING / PERFORMANCE

Works: The easy-going warmth requested in the brief is very present. The eyeline is consistent and helps tell the story of the relationship with Frankie.

Why not full score: The dialogue could benefit from a slightly more varied rhythm to fully land the 'wit' described in the character notes.

Close the gap: To reach a 100, find one more moment of 'wit' in the dialogue to contrast the 'lost in love' energy, perhaps a sharper reaction to the signature move mention.

Standout delta: The specificity of the internal thought process during the song's bridge is what elevates this from a good performance to a professional one.

VOCAL PERFORMANCE

Works: The song choice perfectly demonstrates the 'contemporary legit' requirement. The intonation is precise and the vibrato is well-controlled.

Why not full score: A few minor moments where the breath support could be even more grounded to sustain the longest phrases with more ease.

Close the gap: Ensure the final consonants on the quieter, more 'legit' phrases are as crisp as the beltier sections to maintain lyric clarity.

Standout delta: The seamless transition between the chest-dominant mix and the headier legit tones is exceptional.
